Abstract

Polygons representing the extent of land use zones relating to the rules within the District Plan administered under the

Resource Management Act (1999). This dataset is derived from various sources. The zones are predominantly defined by cadastral boundaries and survey pegs. These data are subject to changes undertaken through the Resource Management Act.

Purpose

The Zones are used as a guide in the regulatory process of implementing the Waikato District Plan and managing land use, subdivision, the environment and economy. Relates to the implementation of the District Plan under the Resource Management Act (1991), and may be subject to various limitations and conditions. These features are a spatial representation of the zoning to support the policies and objectives of the Waikato District Plan and indicate where policies, overlays and District Plan rules apply.
