#### Abstract

Areas where aggregate extraction is an existing activity. The extent of this policy area was created from information obtained from geological and mineral maps from GNS. The data interpretation was undertaken by Waikato District Council Policy Planners.

## Purpose

To protect access to and extraction of mineral resources from specific sites, which were operating as: an existing extraction industry under a current resource consent; resource consent and mining licence or mining licence and existing use rights at the time of the 2004 District Plan Review. New development on adjacent sites are subject to extended building setbacks from Area Extraction Policy Areas (AEPAs) to reduce reverse sensitivity. Relates to the implementation of the District Plan under the Resource Management Act (1991), and may be subject to various limitations and conditions. These features are a spatial representation of the policies and objectives of the Waikato District Plan and indicate where policies, overlays and District Plan rules apply.
