Abstract

Polygon representing areas that are subject to levels of noise above ambient or usual conditions. Relates to specific requirements in the building code. This is a dataset derived from various sources and may have limited update cycles. Original Source data is no longer available for reference.

Purpose

Polygons identifying areas subject to known levels of noise and require buildings to comply with certain rules and building codes. Policies in these areas will relate to mitigation of adverse effects of noise such as insulation, vegetation or other measures. Relates to the implementation of the District Plan under the Resource Management Act (1991), and may be subject to various limitations and conditions. These features are a spatial representation of the policies and objectives of the Waikato District Plan and indicate where policies, overlays and District Plan rules apply.
