

River Stability Policy Area

Title

River Stability Policy Area

Creator

Waikato District Council

Publisher

Waikato District Council

Description

River stability policy areas are located in numerous places along the Waikato River from the southern boundary of the district to Ngaruawahia. The layer identifies areas along the river bank that are considered unstable and potentially subject to erosion. This layer was introduced by way of an Environment Waikato submission (points 108-110) and first featured in the 2006 version of the Proposed District Plan. Submissions raised the following matters: Lowering riverbed levels and riverbank instability along the Waikato and Waipa rivers indicates the need for development setbacks; Amend rules 21.52.1, 25.59.1, 24.46.1 and 22.45.1 building setbacks along the Waikato and Waipa rivers to ensure bank instability is avoided. This is a dataset that was produced through the District Plan submissions process and will not have any known update cycle. Original Source data may possibly be available from Waikato Regional Council.
