Abstract

These are polylines representing the approximate location of high voltage electricity transmission lines. Various rule relate to land use activities within the vicinity of the transmission lines. Data will be derived from extracts from asset systems, positional accuracy is not known. This is a dataset derived from various sources. The data has not been updated due to RMA

procedures. More up to date information is available from Transpower. Users are advised to seek updates from Transpower. Original Source data is no longer available for reference.

Purpose

The location of the powerline centreline is indicative only and should be used for guidance. Site visits and surveys should provide the appropriate level of detail. The measurement of setbacks for buildings should be made on site and these data are used for indicative location only. It is not know when cables are above or below ground. Relates to the implementation of the District Plan under the Resource Management Act (1991), and may be subject to various limitations and conditions. These features are a spatial representation of the policies and objectives of the Waikato District Plan and indicate where policies, overlays and District Plan rules apply.
